

WHITEPAPER

Introduction

Welfarerat isn't just another cryptocurrency; it's a movement that blends meme culture, gaming, DeFi, and the Web3 ecosystem into one dynamic and engaging project. Designed for a vibrant community of meme enthusiasts, Welfarerat goes beyond speculative gains to deliver real, tangible value through innovative platforms and community-driven initiatives—all without the need for venture capital. This unique approach ensures that the project remains fully community-owned and operated, empowering its holders and fostering long-term growth.

The backbone of the Welfarerat ecosystem is its native token, \$WRAT, which fuels a wide range of activities and offers exciting opportunities for participation. Inspired by successful models like *Hamster Kombat*, where games generated revenue through YouTube and in-game ads, Welfarerat takes this concept to new heights. By monetizing multiple platforms and reinvesting that revenue directly into the \$WRAT token, Welfarerat ensures a self-sustaining ecosystem that rewards its community and drives value.

Note: This is just a guideline, and Whitepaper 2.0 will be released later as the final version. It outlines the main principles, which will be polished and refined.

The Tale of Welfarerat

Welfarerat is a cunning and parasitic creature—a master of living off the generosity—or ignorance—of others. It thrives by collecting welfare checks, borrowing money in small increments (“just 10 here, 10 there”), and riding the waves of memecoin pumps to scrape by. When times get tough, the Welfarerat turns scavenger, foraging for discarded bottles, leftovers from trash bins, or even subsisting on corner moisture and dead flies trapped between window panes.

To survive, they must navigate a hostile system controlled by bureaucratic sheep and avoid the ever-watchful eyes of enforcement agencies cracking down on welfare fraud, tax evasion, and black-market hustles. Success depends on cunning tactics, team cooperation, and strategic decision-making as players outsmart the oppressive system, exploit loopholes, and climb their way to financial freedom in a world designed to keep them trapped.

Habitat and Lifestyle

Its daily routine is a spectacle of indulgence and idleness. The Welferarat fuels itself with beer and energy drinks, paired with a steady diet of unhealthy, high-carb meals—pizza, kebabs, or whatever ready-made dish it can grab on the cheap. Its entertainment comes in the form of video games, endless hours of online videos, and questionable internet rabbit holes.

Most nights, as working folk—the so-called "sheep"—prepare for bed or their next workday, the Welferarat gleefully floods the web with sheep memes, declaring its self-styled "free lord" lifestyle. Free from the constraints of rigid schedules, it insists it can do whatever it pleases, whenever it desires, unlike the sheep shackled to the grind of 9-to-5 jobs.

Despite the Welferarat's bravado, it is neither highly social nor particularly sharp. Found in every corner of the globe, it nests in cramped studio apartments or dingy, low-cost flats. These nests are cluttered and grimy, reflecting the chaotic life of their occupant.

The Welferarat takes pride in dodging the entities it despises most: social workers, employers, military recruiters, and government officials. Boasting about paying little to no taxes, it skillfully avoids steady work, reveling in its ability to live off the system while staying under the radar.

A Day in the Life of a Welferarat

The Welferarat's day begins well past noon, when the sun is high and the sheep are knee-deep in their workday. Stretching lazily from its bed, the rat immediately checks its favorite online forums and imageboards for the latest memes. A cold slice of pizza and a can of energy drink serve as breakfast, kickstarting hours of meme crafting and online posting to entertain its fellow "free lords."

As the afternoon drifts into evening, the Welferarat transitions to video games, grinding away to climb leaderboards or achieve virtual milestones. By the time the sheep are fast asleep, the Welferarat reaches its peak productivity.

Late into the night, it is a whirlwind of activity—posting memes, browsing forums, and scheming its next move in the ever-unpredictable world of cryptocurrency. Whether plotting its next memecoin play or reveling in the freedom of its unstructured life, every day is an adventure for the Welferarat—a celebration of its rebellion against the constraints of the 9-to-5 grind.

Key Features of Welferarat

Meme Culture Integration

Welferarat thrives on the power of meme culture, cultivating a fun, lively experience for both meme and crypto enthusiasts.

Gaming (Play-to-Earn)

Welferarat's P2E model lets players earn points by progressing through its games, transforming gaming skills into real-world rewards. Year, Monthly, and Weekly prizes for Teams and individual players by best in leaderboard.

Swap & Launchpad

A user-friendly platform for token swapping and launching new projects, ensuring easy access to the latest crypto ventures.

DEX (Decentralized Exchange)

Every token launched through Welferarat's Incubator Program will have its exclusive launch on the Welferarat DEX. This fully integrates the ecosystem while providing liquidity and accessibility to new projects.

Coin Incubator Program

Designed to support emerging crypto projects, this program enables the community to vote on which ventures receive community funding. Welferarat holds a small percentage of tokens from launched projects (vested gradually to prevent sudden price impacts). Proceeds contribute to \$WRAT token buybacks, strengthening the overall ecosystem.

Yield Farming & Liquidity Provision

Participants can earn passive returns through liquidity pools and farming, benefiting from multiple profit opportunities within the ecosystem.

Rewards

Active community members earn \$WRAT tokens, promoting continuous engagement and loyalty.

Merchandise Store

A dedicated store offers Welferarat-themed merchandise, letting fans showcase their meme culture pride while supporting the project.

NFT Integration

Welferarat embraces the booming NFT market, allowing users to buy, sell, and trade unique digital assets representing in-game items, characters, and collectibles.

Crypto Gambling & Prediction Market

The platform introduces crypto gambling opportunities, offering various games and betting options. Winnings are paid out in \$WRAT tokens, enhancing the token's utility.

Telegram Sniper and Trading Bot

Welferarat introduces a sophisticated Telegram-based sniper and trading bot with advanced features comparable to platforms like Banangun and Bonk.

Summary: Core Concept & Gameplay of Welfarerat

Theme & Narrative

Welfarerat is a satirical and comedic game set in a world where rats struggle under a sheep-run bureaucratic society, constantly battling economic pressures and government enforcers. Players take on the role of rats trying to escape the 9-to-5 grind while facing relentless challenges such as taxes, rising bills, rent hikes, welfare check reductions, and inflation.

To survive, they must navigate a hostile system controlled by bureaucratic sheep and avoid the ever-watchful eyes of enforcement agencies cracking down on welfare fraud, tax evasion, and black-market hustles. Success depends on cunning tactics, team cooperation, and strategic decision-making as players outsmart the oppressive system, exploit loopholes, and climb their way to financial freedom in a world designed to keep them trapped.

Core Gameplay

Players control a customizable rat avatar, which can be upgraded through leveling. They can either join teams of up to 20 members or compete individually for prizes based on leaderboard rankings. The game offers weekly, monthly, and yearly competitions where players earn points through various activities.

Team vs. Individual Competition

- Team Mode: Players can work together to earn rewards by pooling resources, completing team-based challenges, and engaging in team vs. team battles.
- Solo Mode: Individuals can climb the personal leaderboard through duels, strategic resource management, and solo activities.
- Team play 1v1 Duels: Players can challenge other teams opponents for rewards, choosing to wager either a portion of their total team points or solely their own points—win or lose!

“Rats are Rats” Mechanic: Trust vs. Greed

Players face key moral choices:

- Building a strong and trustworthy team is crucial to success. You need reliable players whose decision-making you can trust. Will you assemble a team from different time zones to maximize gameplay hours throughout the day, or will you form a group with friends to compete together in battles?
- Gambling Risks: Players can bet their own or their team’s funds in high-risk, high-reward mini-games, making trust and risk management a key part of the gameplay.

Engaging Game Loop & Features

- Daily Grind: A tap-based mini-game where players earn base points by fighting sheep bureaucrats, climbing corporate ladders, or completing meme-inspired challenges.
- Random Economic Events: Surprise tax days, interest rate hikes, and economic crashes force players to adapt their strategies.
- Gambling & High-Risk Bets: Players can wager in team-approved gambling games or high-stakes betting competitions.
- Character Progression: Leveling up rats unlocks new skills (e.g., stealth, charisma, strength) and cosmetic upgrades (e.g., cyberpunk outfits, gangster suits).
- Team Boss Battles: Weekly or monthly big sheep bosses require full team cooperation, with rewards distributed based on contributions.
- 1v1 Combat System: Fast-paced duels where players bet on themselves, compete in turn-based battles, and engage in stat-based combat.

Social & Community Features

- Team Roles & Leadership: Players can take on roles such as Treasurer, Strategist, or Recruiter, each with specific responsibilities.
- Team Chat & Bulletin Boards: Allows coordination for battles, strategy discussions, and in-game governance.
- Internal Politics & Voting: Teams can vote to punish greedy members, enforce spending limits, or even overthrow ineffective leaders.

Revenue Distribution

The Welfarerat ecosystem will generate revenue through various channels, including:

- Social media platform and in-game ads
- Affiliate sales
- Transaction taxes
- Merchandise sales
- NFT sales
- Liquidity provision
- Swap taxes
- In-game purchases
- Crypto casino activities

70-80% of these monetized funds will be allocated to ecosystem growth, such as:

- Buyback and Liquidity Lock: Reinforcing liquidity reserves for long-term stability
- Yield Farming: Investing in diverse pools to maximize project value
- Airdrops: Rewarding active community members
- Holders: Providing additional tokens to supporters
- In-Game Wins: Distributing play-to-earn rewards

20-30% will cover essential operational and developmental costs, including:

- Marketing: Expanding brand reach
- Ecosystem Building: Introducing new features, partnerships, and innovations
- Running Costs: Covering overhead like server fees, salaries, and legal advice
- Treasury: Maintaining a reserve fund to mitigate risks and support growth

Tokenomics Overview

- Total Supply: 28 trillion tokens (28,000,000,000,000)
- Blockchain: Solana
- Decimals: 9
- Buy/Sell Tax: 1%
- **Token Distribution**
- Pinksale Fairlaunch: 3%
- Raydium Liquidity: 50%
- Team & Advisors: 10%
- Marketing: 5%
- Treasury: 5%
- Cex and Dex Listings 4%
- Game Development & In-Game Wins: 23%
- **Fairlaunch Details**
- The Pinksale Fairlaunch will offer 3% of the total token supply for sale, with a target soft cap of approximately \$100,000 in SOL.
- Of the raised funds, 70% will be allocated to the Raydium liquidity pool and locked for 3,650 days (10 years) to ensure long-term liquidity stability.
- The remaining 30% of the raised SOL will be allocated for full-scale marketing and to initiate game and app development.
- **Vesting & Anti-Dump Measures**
- Tokens allocated for Team & Advisors, Marketing, Treasury, and Game Development/In-Game Wins will follow a 24-month vesting schedule.
- The first token release occurs 1 month after launch to prevent dumping and ensure long-term commitment.

ROADMAP

Phase 1:

- ✓ Website & Whitepaper Launch
- ✓ Introduction of Welfareat Meme Culture
- ✓ Community Building & Social Media Outreach
- ✓ Formation of Official Telegram & Social Media Channels
- ✓ Team Expansion Contest for Animators
- ✓ Pinksale Fair Launch and Raydium
- ✓ Coinmarketcap and Coingecko listing
- ✓ CEX and DEX listings
- ✓ Marketing campaign

Phase 2:

- ✓ Advisor Onboarding & Team Expansion
- ✓ Strategic Marketing Partnership Announcements
- ✓ Whitepaper & Tokenomics Version 2.0 Release
- ✓ Meme Culture Integration & Merchandise
- ✓ Meme Competitions & Influencer Collaborations
- ✓ P2E Game Development & Beta Testing
- ✓ Staking Program Deployment (Incentivized Staking & Tiered Rewards)

Phase 3:

- ✓ NFT Integration (In-Game Utilities & Collectibles)
- ✓ Yield Farming & Liquidity Pool Establishment
- ✓ Telegram Sniper & Trading Bot Development (Inspired by Bananagun & Bonk)
- ✓ Swap & Launchpad Development (Project Fundraising & Token Swapping)
- ✓ Coin Incubator Program (Community-Driven Voting & Funding, Pump and Dump blocking)
- ✓ Crypto Gaming License Application

Phase 4:

- ✓ Crypto Gambling & Sports Betting Platform Launch
- ✓ NFT Marketplace Expansion (Limited-Edition & User-Tradable Items)
- ✓ Community Rewards Program (Enhanced Staking & Loyalty Incentives)
- ✓ Major CEX Listings & Global Partnerships
- ✓ Continuous Ecosystem Growth & Future Developments

Project Disclaimer

1. General Information

The Welfarerat coin (“Welfarerat,” “WRAT”) is a cryptocurrency initiative inspired by meme culture and designed to integrate gaming, decentralized finance (DeFi), NFTs, and Web3 technologies. The content of this whitepaper, including all associated materials, is for informational purposes only and does not constitute financial advice, an offer, or a solicitation to buy, sell, or trade any financial instruments or assets.

2. No Guarantee of Success

The success of the Welfarerat coin, including the \$WRAT token, gaming platform, or any other aspect of the ecosystem, is not guaranteed. There are inherent risks associated with cryptocurrency and blockchain-based investments, including but not limited to volatility, market fluctuations, regulatory changes, and technological failures. Past performance or projections are not indicative of future results.

3. Not Financial or Investment Advice

This whitepaper and its contents do not provide, and should not be construed as, financial or investment advice. Any decisions made by individuals or entities regarding participation in the Welfarerat ecosystem are made at their own risk and discretion. It is recommended that all participants seek the advice of qualified financial, legal, and tax professionals before making any investment or financial decisions.

4. Risk of Loss

Investing or participating in cryptocurrency projects, including \$WRAT tokens, carries a high risk of loss. Participants may lose part or all of their investment due to factors such as market volatility, security breaches, technical failures, and other risks. The Welfarerat team does not accept liability for any financial loss incurred as a result of participating in the ecosystem.

5. Regulatory Compliance

The regulatory landscape for cryptocurrencies and decentralized finance is rapidly evolving. Welfarerat does not guarantee compliance with all regulations in every jurisdiction. It is the responsibility of each participant to ensure compliance with the laws and regulations applicable to their location and activities.

6. No Endorsement by Authorities

Welfarerat is an independent initiative and is not endorsed, supported, or approved by any governmental or financial authority. References to government authorities in the project's narrative are part of a meme-based storyline and should not be interpreted as factual statements about any institution.

7. No Obligation to Update

The Welfarerat team is under no obligation to update, modify, or revise the content of this whitepaper. All information provided is subject to change without notice, and participants should verify any material developments independently.

8. Third-Party Risks

Welfarerat may involve third-party services such as cryptocurrency exchanges, DeFi protocols, and marketplaces. The project does not control these platforms and cannot be held liable for any failures, disruptions, or issues arising from their use.

9. Forward-Looking Statements

Certain statements made in this whitepaper and related communications are forward-looking and based on the current understanding and beliefs of the Welfarerat team. These statements are subject to risks and uncertainties, including technological developments, market conditions, and regulatory factors that could cause actual results to differ materially from those expressed or implied.

10. Intellectual Property

All intellectual property, including logos, trademarks, and proprietary materials related to Welfarerat, is the exclusive property of the project team or their respective owners. Unauthorized use, duplication, or distribution of such materials is prohibited.

11. No Guarantee of Liquidity or Market Activity

Welfarerat cannot guarantee the availability of liquidity or the continued activity of the market for \$WRAT tokens. The value of \$WRAT and other assets within the ecosystem may fluctuate and can become illiquid at any time.

12. No Liability for Losses

To the maximum extent permitted by law, the Welfarerat team and its affiliates shall not be liable for any direct, indirect, incidental, special, or consequential damages, or any loss of profits, loss of data, or loss of use, resulting from participation in the Welfarerat ecosystem.

Join us in the Welfarerat journey. Explore the world of meme culture, gaming, and decentralized finance—driven by community engagement and powered by the \$WRAT token.
